System Requirements
Quick Reference

Google

Students are to be aware that as a Google district, our virtual courses rely heavily on Google Applications to deliver and assess instruction. This means that students who take GCVSP virtual courses should have a Google account. In addition, students should know how to use Google Apps to some extent in order to turn in completed assignments and tests or be willing and open to learning. While the program will make every attempt to be flexible, activities and submission of work, outside of Google Apps, will be considered on a case-by-case basis.

Internet Access

GCVSP requires access to the Internet and broadband connectivity. Dial-up Internet is strongly discouraged as some features and content may load slowly or end unexpectedly.

Media content isn't loading?
There are many different types of media on the internet. Make sure that the latest versions of plug-ins such as Java and Adobe Reader have been installed. Browser or network settings can prevent such media from displaying correctly.

GCVSP is not responsible for the technology of the student. It is the student's responsibility to have a back plan, to keep all work on a thumb drive and to notify his teacher immediately if there are tech issues. Technology issues are not a valid excuse for either not handing in work or handing in work late. Late penalties will apply.
